About EMMC
Eastern Maine Medical Center serves communities throughout central, eastern, and northern Maine.

Under community direction, it has grown from a five-bed general hospital into a comprehensive, 411-bed medical center. The medical center and its medical staff of more than 300 physicians provide three-quarters of the primary-care hospital services offered in the Bangor area, as well as specialty and intensive services to the northern two-thirds of the state.

Our neighbors count on us as a resource for healthcare and health information, as a source of support and assistance for area physicians and other healthcare providers, and as a training ground for the health professionals of the future.

EMMC is an American College of Surgeons verified Level II trauma center and host of Lifeflight of Maine, a statewide medical helicopter service that transports critically ill and injured patients.
Welcome to EMMC Pharmacy

The Eastern Maine Medical Center Pharmacy strives to provide excellent service to patients, physicians, nursing staff and others by providing comprehensive, progressive, patient-focused pharmacy services.

EMMC Pharmacy works collaboratively with other healthcare professionals to provide optimal pharmaceutical care for all patients served by the facility by promoting evidence-based, fail-safe medication use.

EMMC Pharmacy staff is dedicated to educating future pharmacists through our affiliations with nine pharmacy schools and our residency program. Our pharmacists are preceptors for Introductory and Advanced Pharmacy Practice Experience students.

James A. Cattin
Director of Pharmacy/PGY2
Residency director

Specialty Area: Pharmacy Administration
Credentials: BS, Pharmacy, Purdue University; MS Pharmacy Administration, Purdue University
Practice Experience: Director of Pharmacy, Eastern Maine Medical Center, 2005 to present; Director of Pharmacy, Lafayette Home Hospital 1979 to 2001.

- Palliative Care
- Emergency Department
- Orthopedics/Neurology
- Rehabilitation Medicine
- Medication Safety
- Medication Reconciliation

To apply visit PharmacyinMaine.org
Eastern Maine Medical Center’s Pharmacy is staffed by a highly skilled team of pharmacists, technicians and support personnel that provide excellent service to our patients, providers and other professional staff.

Our pharmacists and technicians practice within a decentralized model. They are assigned to our inpatient care areas, the Emergency Department, Critical Care and throughout our hospital. Our practice model includes clinical pharmacist generalists and six clinical pharmacist specialists.

In addition, EMMC provides remote order verification and clinical services to other hospitals in our region.

EMMC is a leader in the adoption of technology to advance patient safety. This includes computer provider order entry; barcode medication administration technology; automated storage and retrieval system; barcode enabled automated dispensing machines; smart pumps; USP 797 compliant sterile compounding service; and an extensive electronic medical record system with integrated clinical decision support.
Our Residencies

PGY1 Hospital Pharmacy Residency

Eastern Maine Medical Center’s PGY1 Residency offers a comprehensive introduction to the practice of Pharmacy. The program offers an opportunity to advance knowledge in many practice areas.

**Required Rotations:**
- Infectious Diseases
- Internal Medicine
- Critical Care
- Pediatrics
- Pharmacy Informatics
- Service

**Longitudinal Rotations:**
- Drug Use Policy
- Administration
- Research Project
- Medication Safety

**Electives Include:**
- Palliative Care
- Emergency Department
- Decentralized Practice
- Cardiology
- Anemia Management
- Oncology/Hematology
- Anti-microbial Stewardship
- Neonatology

Our residency will prepare pharmacist clinicians to perform as clinical pharmacists, serve as adjunct faculty or enter PGY2 training. Residents are allowed vacation, full healthcare benefits, discount meals and travel allowance to the ASHP mid-year and Eastern States Conference.

PGY2 Health-System Pharmacy Administration

The Director of Pharmacy serves as the Program Director and primary preceptor of the program. The resident will participate as an active member of the pharmacy leadership team and will have input on key hospital issues that impact the medication use process. Experiences and areas of focus include:

- Pharmacy Operations
- Financial Management
- Medication-Use Policy
- Medication Safety
- Human Resources Management
- Strategic Planning
- Participation in Committees
- Performance and Quality Improvement
- Regulatory and Accreditation Requirements
- Clinical Operational Planning
- Information Systems
- Technology Systems
- Precepting PGY1 Residents
- Special Projects
- Staffing in Decentral and Central Pharmacy Areas

The Director of Pharmacy serves as the Program Director and primary preceptor of the program. The resident will participate as an active member of the pharmacy leadership team and will have input on key hospital issues that impact the medication use process. The resident will assume staffing and clinical responsibilities four days per month.
